I am a creative and motivated computer technician and web designer with several years experience with computer networking, repair and web programming.

## Highlights of Qualifications

- Set up a Mac OS X server with mobile users, email and printing for MDI High School with 700 students and teachers.
- Wrote a PHP tool to manage a DHCP server handling about 1000 computers and devices.
- Administer and Develop a growing Maine community site MEEvent.com
- I'm currently enrolled at UMaine Augusta for Computer Information Systems.

## Qualifications

### **Computer Maintenance and Networking:**

- 4 Years experience with Computer Repair, Diagnostic, and Networking at MDI High School
- 8 Years with Unix and Mac OS X
- 3 Years with Linux, Mostly Gentoo (Command Line)
- 1 Year with Mac OS X Server
- CompTIA Network+ certified
- Unix Bash and PHP Scripting

### **Web Design and Programming:**

- About 5 Years of experience with PHP / MySQL / HTML
- 1 Year experience with XHTML / CSS / JavaScript / JSON / PHP Smarty
- Familiar with Database theory

### **Other Experiences:**

- Basic Digital Video, Shooting and Editing
- Microsoft Office '07 Excel and Access
- Hobby Digital Photographer

## Education

- **Summer 2007 – Present:** Majoring in Computer Information Systems at the University of Maine at Augusta part time
- **Fall 2002 – Spring 2007:** Mount Desert Island High School (MDIHS) & Independent Study in the Computer Department
- **Fall 2005 – Spring 2006:** Network+ at Hancock County Technical Center & Independent Study in the MDIHS Computer Department

## Work Experience

- **Winter 2007-Present:** Work managing a Web Site, as well as some computer related issues for Charlie's, one of Maine's largest car dealership franchises.
- **Summer 2007-Present:** Independent Web Development and maintenance for several local computer stores. Mostly working writing back-end's for already designed web sites.
- **Summers 2003-2006:** Worked at Mount Desert Island High School in the Computer Department doing Repair, Imaging, Server, Networking and Future Planning. I also made a few PHP interfaces from common Unix tasks such as, batch adding network users and managing a DHCP server.
